SPREAD THE LIGHT

Introducing the IR blaster - the device that lets you control all of your electronics from one convenient location, right on your mobile app. Simply set up the IR blaster to recognize all of your devices, and you can easily adjust settings, change channels, and navigate your favorite streaming services without ever leaving your seat. No more searching for lost remote controls or juggling multiple ones. Simplify your entertainment experience and take control of your devices with an IR blaster today.

Welcome to the future of home automation, where comfort and convenience are just a touch or voice command away. With our cutting-edge products, you have the power to control your entire home from your smart phone - even when you're on the go.

Set the perfect atmosphere with customizable lighting and temperature settings, and manage your home's security with ease. And for the ultimate hands-free experience, use voice commands to activate your desired settings effortlessly.

HOME AUTOMATION

Introducing revolutionary new line of home automation series,  
the future of comfort and convenience is here!

Say goodbye to the hassle of managing your home's temperature, lighting, and security systems manually. With our cutting-edge technology, you can control your entire home with just the touch of a button.

Imagine waking up to a perfectly warm home, with your favorite music already playing and your coffee brewing. With our Vi-fi smart system, you can set the perfect morning routine and enjoy a stress-free start to your day.

But that's just the beginning, you can even customize your home's atmosphere to match your mood. Set the lighting to dim and the music to mellow for a cozy night in, or bright and upbeat for a fun-filled party with friends.

And the best part? You can control it all from your smart phone also. Whether you're at home or on the go, you're always in control.

Upgrade your lifestyle and experience the future of home automation.
